Summary

Ruby on Rails Full Stack Developer with **4 years of experience** building scalable web apps, RESTful APIs, and third-party integrations in promotional and jewelry ERP domains. Strong expertise in **Rails, ReactJS, SQL Server, and performance optimization**. Known for clean, test-driven code and effective collaboration, leadership, and mentoring within Agile teams.

Education

BTech in CS, IES IPS Academy Indore

Sept 2018 – May 2022

- **CGPA:** 8.62/10
- **Coursework:** OOPS Concepts, Data Structure and Algorithm, Operating System, DBMS, Solid Principle

Technologies

Languages: Ruby, JavaScript, HTML, CSS, Java

Technologies: Ruby on Rails, SQL, MERN, NodeJs, ReactJS, Redux, Tailwind CSS, Redis, Sidekiq

Tools: Postman, Git, Github, VS Code, Windows, Linux

Experience

Software Engineer, Diaspark Infotech Pvt. Ltd

July 2022 – Present

- Full-stack development for ERP and POS platforms serving 100+ U.S. B2B clients.
- Built secure, high-performance **RESTful APIs** using **Ruby on Rails** for promotional and jewelry ERP modules.
- Developed and integrated **ReactJS** UI components with backend services for admin and POS workflows.
- Refactored legacy codebases, improved modularity, and ensured adherence to clean code and **SOLID** principles.
- Led Flex application builds and deployment, ensuring stable backend integrations and smooth releases.

Projects

Promo Flow

July 2022 – Present

- Developed and enhanced modules for the customer portal, product catalog, and order approval workflows using **Ruby on Rails, ReactJS, and Apache Flex**.
- Worked on multi-tenant backend architecture, including role-based access control and dynamic client-specific logic.
- **Integrated third-party APIs** such as **UPS, FedEx, and Authorize.net** to support payment processing and shipment tracking.
- Improved application responsiveness and reduced server load by optimizing SQL queries and Rails data-access patterns.
- Ensured backend reliability and coverage through RSpec-based testing for core modules.

Jewelry Backoffice and Point of Sale

July 2023 – Present

- **Integrated Zoho, Extend Warranty and Avalara APIs**, embedding them into core POS and ERP workflows.
- Implemented secure token validation and role-based access control for external systems and Internal modules.
- Developed and exposed **RESTful APIs** using **Ruby on Rails** for billing, inventory, and product management.
- Optimized SQL queries and refactored legacy code to enhance API response time, error handling, and maintainability.

Key Achievements

Hackathon : Secure second place in a company-wide hackathon by rapidly building a product in 30 hours to optimize and enhance existing systems.

Academic Excellence Award : Awarded by Chief Minister of Madhya Pradesh for Academic Excellence.
